

# Venture Capital Finance

*it's not just an investment, it's a relationship...*

## Overview

We are an independent organization that propagates the policy of openness to our participant/client of the international currency exchange market, including the crypto currency market by raising the purchase power or their own income there by leading to a rise in consumer surplus.

We offer an easier platform for our clients to invest in a wide range of assets and securities which include crypto currency, foreign exchange rates and inflations, international and domestic equities, precious metals and commodities (Gold, Copper, Oil), stock, ventures capital bonds, real estate futures and money markets utilizing a system that works with strict risk management procedures and fund allocation to minimize the risks of the market while boosting the profitability of each portfolio, most of all assets under our strategy is completely backed up by the company , never trading outside risk boundaries each investment is made on the basis of merit alone: our team must genuinely believe that it's value is likely to increase and be comfortable that the potential rewards justifies any exposure to risk.

## Investment Plan

Each participant/investor is entitled to invest particularly in currency trades for daily returns or take a diversified investment approach which facilitates a more profitable long-term portfolio, depending on the strategy most convenient for the participant and financial motive or interests of the investor.

We trade a list of currency pairs along with crypto currencies on the foreign exchange market which grants the organization ample time to capitalize on each surge and bullish movement effectively while also trading crypto personally on bitmex, binance and bybit to acquire multiple returns in profits regardless of the volatility of the market.

# Diversified Investment Plans

Our progressive investment blueprint demand a sensible approach towards asset allocation.

Asset allocation simply explains the extension of your investment portfolio across different asset classes, such as equities, fixed interest, properties, cash, commodities etc. by implantation, balancing and analyzing the historic risk versus the return profiles of a number of different asset classes in the market and then determining optimal combinations, we deemed able to build portfolios and allocate capital in percentages to maintain a fixed and maximized return in profit.

# Terms and Conditions

We work strictly with transparency which means client can monitor his/her investment on the firm's platform to check the growth of investment and otherwise.

You'll have full user access to your funds any point in time eligible to withdrawal upon a 24 hour notification period. We allow this flexibility because VCF Investment believe in operating closely with investors, giving them full access to their funds without any restriction.
